1817	3459	52,689				

The mail is transported in stages, each day in the year, 10,121 miles.

The mail is transported in sulkies and on horseback, each day in the year, 10,616 miles, making 20,737 miles per day.

If you divide the post-roads of the United States into two distinct post-routes, the mail will travel each week, in *stages*, nearly equal to three times round the globe; and divide all the post-roads in the United States into four equal or distinct post-routes, on which the mail is carried in stages, sulkies, and on horseback, it will be equal to a travel of six times, *each week*, around the globe; averaging one post-offices for every fifteen miles of post-road.

The mail is transported, by a direct or corresponding line of stages, from Anson, in the state of Maine, via Washington City to Nashville, Tennessee, a distance of *one thousand four hundred and forty-eight miles*, in a south-western direction. The mail is transported, by a direct line of stages, from St. Mary's, in Georgia, to Highgate, in Vermont, *via* Washington City; a distance of 1,369 miles, in a northern direction. These remarks apply to March, 1817.
